Sales & Rentals

From more than twenty years our work is to sell and locate properties in Monza, Milano and in Brianza concerning the residential, commercial and industry domain.

Our team's professionalism allows us to help the customer with the best discretion in the whole transaction phase and guarantees specific advising in the real estate domains.

Property managements

Side by side to the intermediation's traditional services, we have developed and structured a specialized sector for the property management according to property experiences and facility management.

We are able to guarantee the correct administration concerning rentals and the efficient management for the services and the attendances. A concrete possibility to "forget" any locative problem and to get benefits from the own investment.

Customers

Our client is various and exigent: investors, builders, companies, privates, real estate tenants and owners.

Our customers trust in us since many years. They are a precious source for new important impulses able to give an effective service.

A new space

in the centre

of Monza.

An innovative real estate guideline

A technological window for those
who are offering and looking
for a real estate property

A place where art and culture meet

Real Estate Orientation

It's more and more difficult to orientate in the real estate world. It's not so direct to have absolute answers to the real estate questions.

Our aim is to value all the options with our customers in a benefit way.

We are working to offer a dynamic advising able to give continuous and customized "route-adjustment" in order "to land" to the best solution.

Technological Window

The strategic location choice is not the only way able to ensure visibility and success and so, beside to be located in the centre of Monza, we have invested in the most important and modern technologies, from the VOIP phone system to the digitalized and animated programs for LCD windows, in order to offer to our customers an important real promotion's tool.

Marketing and Communication

It's necessary to monitor the market always evolving in order to be concurrent and able to offer solutions strictly related to the customers' requests.

It's even important to develop some new promotion and selling approaches, side by side to the real estate's quality.

We are ultramodern in the advertising sector, and we are going on to invest energies and resources to look and implement new and effective communication canals able to give visibility to our "products and services" and to fortify the relationships with our customers. Web-advertising, events, videos, rendering, reporting, public relations, expositions, ...these are only some of the tools that allow us to reach the prefixed targets and, at the same time, to increase the customers' satisfaction.

Art and Culture

We have created SpazioValtorta and its exclusive events to promote our services in a luxury domain. We want it to be a meeting and cultural place. A space opened to all the artistic waves and expressions in order to value our zone and to appreciate new lifestyles.
